YOU'RE NOT YOU
WHEN YOU'RE
~~HUNGRY~~
USING AI
AI

WHY THIS MATTERS

THE PROBLEM IS REAL

Privacy exposure and uncritical AI use are measurable risks.

39.7%

Sensitive data

of observed data movements into AI tools involved sensitive information.

Cyberhaven Labs · 2026

70%

Personal information

of queries in a studied WildChat sample had some automatically detected PII.

Trust No Bot · 2024

319

Knowledge workers

surveyed; greater confidence in AI was associated with less critical-thinking effort.

Microsoft / CMU · 2025

WELCOME TO

THINKSHIELD AI

Protect the prompt. Pause to learn. Question the answer.

01

PRIVACY GUARDIAN

PROTECT THE PROMPT

Find sensitive details
Apply explainable rules
Suggest a safer prompt

“Did you mean to share that?”

02

AI MIRROR

PAUSE + LEARN

Reflect on what you typed
Explain why it may be risky
Build safer habits over time

“Why might this be risky?”

03

THINKING COACH

QUESTION + VERIFY

Challenge AI assumptions
Spot claims needing evidence
Choose how to verify

“What would you check?”

UNDER THE HOOD Decision trees • Domain policies • Testable AI governance (ADLC)

THE AI AUTOPILOT PROBLEM

YOU'RE NOT YOU WHEN YOU'RE ~~HUNGRY~~ USING AI.

AI MIRROR:

"Did you mean to do that?"

THINKSHIELD AI THE AI THAT ASKS BACK.
